

# Least Discrepancy Search

Assume that branching left is the direction indicated by the heuristic.  
Then, least discrepancy search visits nodes in the following order:

Stage	Visit Order	Branching Decision	Node Visited
0:	1	LLL	A
1:	2	RLL	E
	3	LRL	C
	4	LLR	B
2:	5	RRL	G
	6	RLR	F
	7	LRR	D
3:	8	RRR	H
