

Tinderbox; 1

- Limited warranty and disclaimer; 3
- Software license agreement; 3
- How to use this manual; 5

Terminology and Basics; 7

- Hierarchy; 7
- Notes; 7
- Links; 8
- Windows; 8
- Cursors; 10
 - Hand cursor; 10
 - Marquee cursor; 10
 - Arrow cursor; 11
 - Switching cursors; 11
- Text windows; 10
- Contextual menus; 11
- Common features to expect; 12
- Wizard; 12

Notes; 13

- Basic operations,
 - creating a note; 15
 - deleting a note; 16
 - writing in a note; 16
 - renaming a note; 17
 - putting a border around a note; 18
- Notes and URLs; 18
- Finding text in a note; 19
- Listing all notes in a document; 19
- Scripts; 19
 - associating a script with a note; 20
 - removing a script from a note; 20
 - running a script manually; 20
 - turning off automatic running; 20
- Files; 20
 - associating a file with a note; 21
 - removing a file from a note; 21
- History; 21
 - clearing the history list; 21
 - opening the history list; 21
 - visiting a note in the history list; 21
- Prototypes; 22
 - creating a prototype; 22
 - using a prototype; 23

Writing in Notes; 24

- Opening a text window; 24
- putting an image into a note; 24
- typing in a note; 24
- copying an image of the current view window; 25
- Spell check; 25
- Text appearance; 25
- Creating notes, writing quickly; 26

Preferences; 29**Views; 32**

- Types of windows; 32
- View windows; 32
- Moving around; 34
- Arrow keys; 35
- Changing scale; 35
- Contextual menus in views; 35
 - menu of notes; 35
 - note commands; 35

Map Views; 37

- Links; 38
- Moving notes; 38
 - expanding a note so that its long title fits; 38
- Adornments; 39
 - adding an adornment; 39
 - modifying an adornment; 39
 - locking an adornment's position; 40
 - making an adornment "sticky"; 40
 - deleting an adornment; 41
- Picture adornments; 41
 - adding a picture adornment; 41
- Cleanup; 42
- Up-arrow use; 43

Outline, Chart, and Treemap views,

- Outline views; 44
 - disclosure triangle; 45
 - hoisting; 46
 - identifying prototypes; 46
- Chart views; 47
 - disclosure triangle; 47
- Treemap views; 47
- Up-arrow or left-arrow; 48

Hierarchy; 49

- terminology; 51
- Seeing hierarchy; 52
 - map views; 52
 - treemap views; 52
 - chart views; 53
 - outline views; 53

Arranging Notes; 54

- Outline views; 54
 - shift-tab; 55
 - tab; 55
- Chart views; 55
- Treemap views; 56

Links; 57

- Types of links; 57
- Creating links; 58
 - in any view window or list of notes; 58
 - using a parking space; 59
 - from text; 60
- Internet links; 61
- Link types; 62
 - assigning a type to a new link; 62
 - assigning a type to an existing link; 63
 - modifying a link type's attributes; 63
- Changing the text in a text link; 64
- Creating a link to text; 65
- Viewing links in the Links window; 65
 - from any view window; 66
 - from anywhere; 66
- Viewing links with the Roadmap; 66
 - changing the focus of a roadmap; 67
 - opening a roadmap; 67
- Deleting links; 68
 - from anywhere; 68
 - in a map window; 68
- Deleting text links; 68
- Changing a link's type; 69
 - from anywhere; 69
 - in a map window; 70
 - in a text window; 70

Following links,

- Following a text link; 71
- Following a basic link; 72
- Following a link backwards; 72
- Choosing which link to follow; 73
- Overlapping text links; 74
- Which link will be followed?; 74
 - was the click within a single text link?; 74
 - was the click within overlapping links?; 75
 - follow the first (uppermost) link in the list of links that is not a text link; 75
- Changing a link's priority; 75

Attributes; 76

- Seeing attributes in a text window; 78
- Modifying an attribute in a text window; 79
- Attribute palette; 79
 - opening from anywhere; 80
- Changing an attribute's value; 81
 - using the quick stamp; 82
 - using an info window; 83
- Setting an attribute's default value; 84
- Creating a new attribute; 85
- Attribute types; 86
 - string; 86
 - color; 86
 - file; 88
 - boolean; 88
 - date; 88
 - number; 89
- Attributes and agents; 89
- Attributes and HTML; 89
- Attribute reference list; 90
 - User tab; 90
 - System tab, AGENT; 90
 - System tab, GENERAL; 91
 - System tab, TEXT; 92
 - System tab, HTML; 93
 - System tab, MAP; 96
 - System tab, NET; 98
 - System tab, SORTING; 99

Attributes (cont'd)

- System tab, TEXTFORMAT; 100
- System tab, WEBLOG; 101
- System tab, COLORS; 102
- System tab, STAMPS; 102
- System tab, LINK TYPES; 102

Stamps; 103

- Creating stamps; 104
- Applying stamps; 104
- Using quick stamp; 105
- Using stamps, changing an attribute with Quick Stamp; 105

Aliases; 106

- Creating aliases; 107
- Properties of aliases; 107

Agents; 108

- Creating agents; 109
- Agent search criteria; 109
 - using the expression menus to build a search; 109
 - writing the search yourself; 110
- Agent actions; 114
 - agent action syntax; 114
- Updating agents; 115
 - updating agents all the time; 115
 - updating agents manually; 115
- Agents and dates; 116
- Rules; 116
 - creating a rule; 116
- Agent priority; 119
 - changing the AgentPriority attribute; 119

Note tool; 120

- Creating an annotation note; 120

Actions; 122

- Action syntax; 122
- Assigning an action; 123
- Actions and export; 124

Toolbar; 125

- hiding the toolbar; 125
- layout diagram; 126

Fetching from the Web; 127

- Attributes for working with the Web; 128
 - URL; 128
 - AutoFetch; 128
 - ViewInBrowser; 128
 - ReadOnly; 128
 - LastFetched; 129
- Examples,
 - fetching content from a Webpage; 129
 - opening as a Web page; 129
 - URL bookmark; 129
 - Network palette; 129

Tinderbox and RSS; 131

- Setting up RSS feeds for others to use; 132
- Receiving RSS feeds automatically; 132
- Manually refreshing RSS feeds; 133
- Controlling the size of your feeds; 134
- Specifying neww RSS templates; 134

Exporting to HTML; 135

- How it works; 136
- HTML templates; 138
- Template syntax; 139
 - paths; 139
- Template wizards; 140
- Many notes in one Web page; 141
- What will transfer to the Web,
 - text; 141
 - images; 142
 - text links; 142
- What will transfer in part,
 - text appearance; 142
 - lists; 143
 - basic links; 144
 - hierarchy; 144
 - overlapping text links; 144
- What will not transfer to the Web,
 - views; 144
 - multi-paragraph text links; 145
 - other interface items; 145
- HTML templates folder; 145

Exporting to HTML (cont'd)

- choosing a default template; 147
- choosing a template for one note; 147
- HTML view windows; 148
- HTML view export choices,
 - export as page; 150
 - export children as pages; 150
 - markup text; 150
 - quote html; 150
 - file name; 151
 - file extension; 151
 - template; 151
 - export folder; 151
- HTML view preview buttons,
 - update; 152
 - export; 152
 - preview; 152
 - edit; 153
- HTML view markup choices,
 - first paragraph; 153
 - subsequent paragraphs; 154
 - before and after; 154
 - bold; 154
 - italic; 155
- HTML view net choices,
 - URL; 155
 - Open in browser; 155
 - AutoFetch; 155
 - RSS Import templates: Channel; 156
 - RSS Import templates: Item; 156
- HTML preferences,
 - URL (Web server); 156
 - HTML Template file; 158
 - Export Links: text links; 158
 - Export Links: basic links; 158
 - Export Links: hierarchical links; 159
 - Export Links: link types; 159
 - Exported file names; 160
 - Open file with; 160
 - Link images as; 160
 - Export paragraphs; 160

Exporting to HTML (cont'd)

- Creating and modifying templates; 161
- exporting a document to HTML; 162
- Attributes for HTML export,
 - HTMLDontExport; 164
 - HTMLExportChildren; 164
 - HTMLExportExtension; 164
 - HTMLExportFileName; 165
 - HTMLExportTemplate; 165
- Getting exactly what you want; 166
- HTML Templates,**
 - A simple template; 168
 - Template codes,
 - carets; 169
 - capitalization; 169
 - operations and values for objects; 169
 - Content codes; 171
 - additional content codes; 173
 - Codes for links; 174
 - sets of links; 175
 - ^childlinks for dynamic content; 178
 - Logical conditions; 179
 - Including other notes; 183
 - Miscellaneous codes; 184
 - Group codes; 187
 - Using Macros; 188
 - Templates and HTML export preferences; 189
 - Example template; 190
- Web Pages Built of many notes; 192**
 - ^children template code; 193
 - Example with ^children; 195
 - Exporting a fixed number of children; 196
 - ^include template code; 196
 - Example with ^include; 198
 - ^randomchildof template code; 199
 - Dates and times; 200
 - including a date; 201
 - formatting a date; 201
 - format codes; 201

**Web pages build of many notes
(cont'd)**

finding and comparing dates; 203

hiding dates; 203

back-dating items; 204

dates and agents; 204

dates and attributes; 205

Pinging; 205

enabling pinging; 206

pinging after updating your
weblog; 206

Posting to remote weblogs; 206

setting up remote blogging; 207

posting to remote weblogs; 208

downloading the most recent
posts; 208

HTML export code reference chart,

Values for "object"; 209

Content codes; 210

Codes for links; 211

Logical conditions; 211

Including other notes; 212

Miscellaneous codes; 214

Group codes; 215

Moving text and images; 216

Drag-and-drop; 217

Exploding; 220

Exporting text; 221

Text export templates; 222
